Dôležité! O farbách na obrazovke

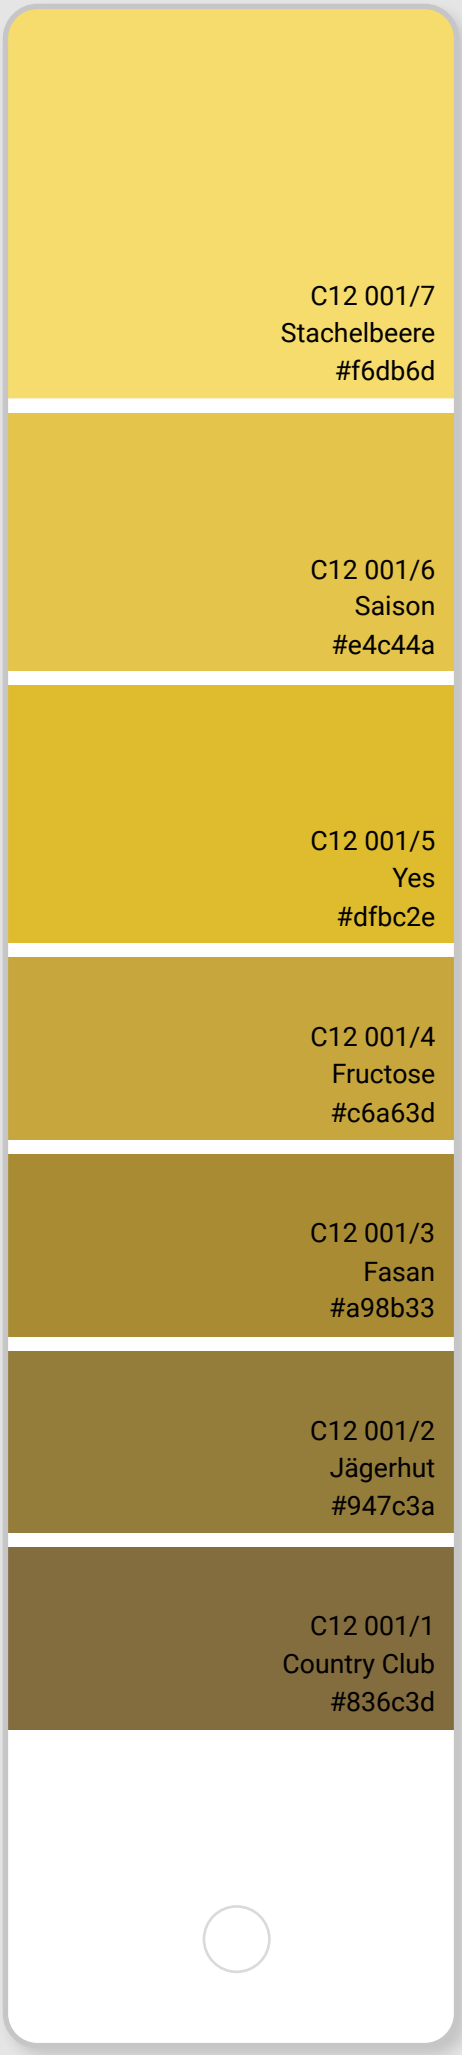

Obrazovka vášho zariadenia sa môže výrazne líšiť v závislosti od individuálnych nastavení, jasu a kontrastu. Preto sa farby zobrazené na obrazovke môžu od skutočných farieb líšiť.
Pre čo najpresnejší výber odtieňa odporúčame vykonať skúšobný náter konkrétnym produktom na konkrétnom povrchu.

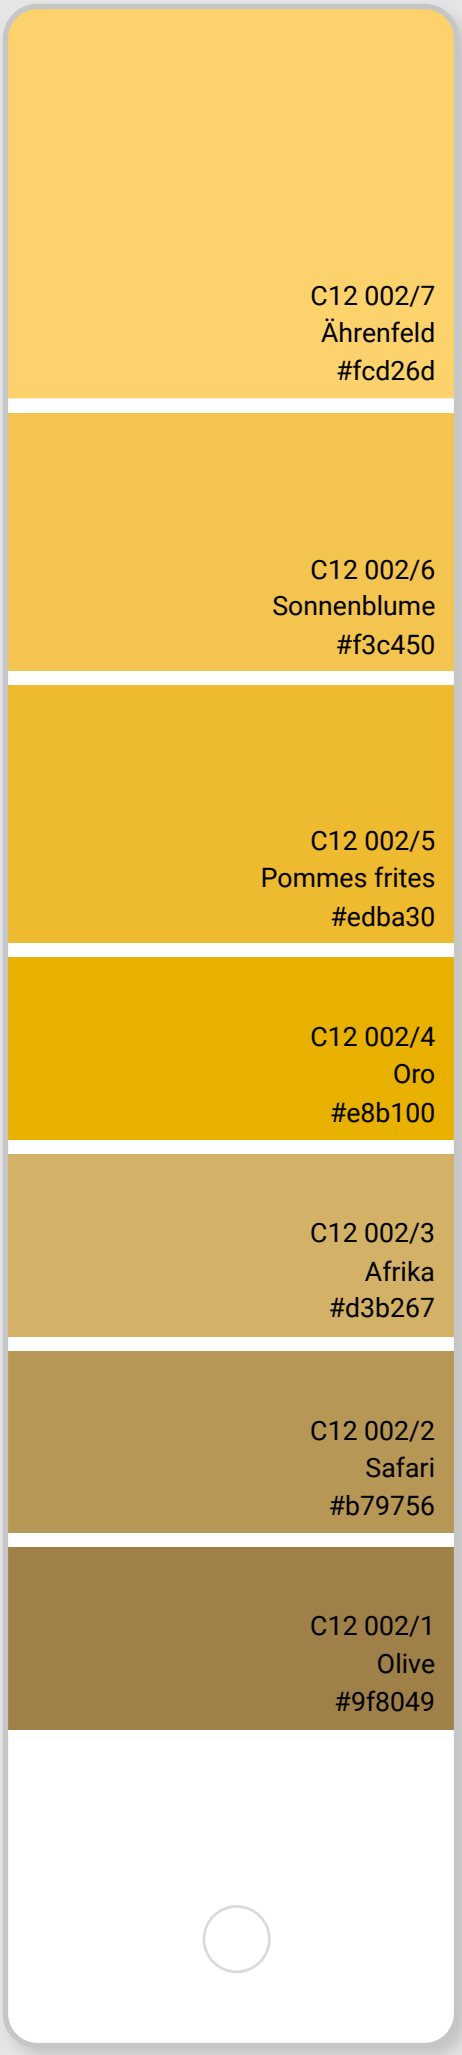

Kontrola zobrazenia

Nižšie uvedená stupnica odtieňov sivej slúži na overenie správneho nastavenia obrazovky. Jednotlivé polia by mali byť jasne rozlíšiteľné, bez farebných odchýlok a bez vzájomného splývania.
Ak tomu tak nie je, upravte nastavenia displeja podľa odporúčaní výrobcu zariadenia.
